Profile

Detail-oriented Full Stack Java Developer with strong experience in building dynamic and scalable web applications using **Core Java, JDBC, HTML, CSS, JavaScript, React js and MySQL**. Skilled in developing end-to-end solutions, including backend logic, frontend user interfaces, and database integration.

Education

Bachelor of Computer Science Dr. Babasaheb Ambedkar University, Sambhajinagar CGPA: 8.22 Percentage: 82.2%	2022 – 2025
Higher Secondary Education (12th) Shri Nigmanand Vidyalay, Nimgaon Percentage: 83%	2020 – 2021
Secondary Education (10th) Shri Nigmanand Vidyalay, Nimgaon Percentage: 70.33%	2018 – 2019

Skills

Backend:

Core Java, Node.js, Express.js, Spring Boot

Frontend:

React.js, HTML, CSS, JavaScript, Bootstrap

Databases:

MySQL, SQL

Developer Tools

Git, GitHub, Postman, VS Code, IntelliJ IDEA, Eclipse IDE

Internship

Software Development Intern

G-Soft Solution – Pune

- Developed and maintained web applications using Java, MySQL, HTML, CSS, JavaScript, and Node.js.
- Designed SQL queries, joins, views, triggers, and stored procedures for real-time DB operations.
- Built full-stack modules with seamless frontend-backend integration.
- Implemented CRUD features and improved system performance.

Projects

1. Product Recommender System

- **Tech Stack:** React.js, Node.js + Express.js, MySQL, Bootstrap, REST API
- Built a full-stack product recommendation system with category-wise browsing (Men, Women, Grocery, etc.).
- I developed REST APIs to facilitate product CRUD operations and to grant role-based access (admin/user).
- Designed a **responsive UI** using React.js and CSS for a seamless user experience.
- Designed an **admin dashboard** to manage product categories and items (add, update, delete, and view).
- Integrated **REST APIs using Axios** to fetch and display backend data dynamically.
- **Link :** <https://quickcartapp.vercel.app/> 📄

2. Employee Management System

Developed a full-stack Employee Management System to manage employee records with complete CRUD functionality using **Spring Boot** REST APIs, React frontend, and MySQL database.

Key Responsibilities & Features

- Designed and developed RESTful APIs using **Spring Boot** and **Spring Data JPA**
- Implemented **CRUD operations** (Create, Read, Update, Delete) for employee data
- Implemented **MVC architecture** and layered design (Controller, Service, Repository)
- Enabled **CORS configuration** for seamless frontend-backend communication
- Performed API testing using **Postman**

Technologies Used :

- **Backend:** Java, Spring Boot, Spring Data JPA, Hibernate
- **Frontend:** React.js, JavaScript, HTML, CSS
- **Database:** MySQL
- **Tools:** Postman, Git, Maven
